

## Special Online Report

The tables below are excerpts from a special report available at <http://marketwatch.bloodhorse.com>, which features the aggregate performance records for yearlings offered and purchased at major North American auctions during 2004 through 2006. These charts used to be featured in the regular edition of the newsletter, but we've produced a special downloadable report this year in order to provide statistics on more consignors and buyers.

The special report includes the consignors listed alphabetically who offered 20 or more yearlings at North American sales during the time period, while the buyers chart is an alphabetical listing of those who purchased 10 or more yearlings. Featured below are the leading consignors by average price and the leading buyers by total purchase price. Racing information for these statistics covers the Northern Hemisphere. The information includes average purchase price, average earnings per runner, number of runners, winners, 2-year-old winners, stakes winners, stakes horses (horses that won and/or placed in a stakes), graded stakes winners, grade I stakes winners, horses to earn \$100,000 or more, Average Earnings Index (AEI), and average starts per runner. The percentages are derived from the number of yearlings offered or purchased. Racing statistics through June 5, 2009.

### Yearling Consignors, 2004-2006

Consignor	No. Off.	No. Sold	Avg. Price	Avg. Earnings	Rnrs (% Off.)	Wnrs (% Off.)	2yo Wnrs (% Off.)	SW (% Off.)	Stks Horses (% Off.)	G5W (% Off.)	G1SW (% Off.)	\$100k+ Earners (% Off.)	AEI	Avg. Starts
Monticule	41	30	\$394,840	\$156,912	36 (88%)	21 (51%)	9 (22%)	5 (12%)	9 (22%)	4 (9.8%)	1 (2.4%)	5 (12%)	4.03	12
